Subject: changes to PCC code

These five suggestions for the PCC code look just what is needed to counter the climate change misinformation campaign against science. The Express, Mail, Telegraph and the Spectator should be watched like a hawk on this!

1. Like-for-like placement of retractions, corrections and apologies in print and online (as standard).
2. Original or redirected URLs for retractions, corrections & apologies online (as standard).
3. The current Code contains no reference to headlines, and this loophole should be closed immediately.
4. Sources to be credited unless they do not wish to be credited or require anonymity/protection.
5. A longer and more interactive consultation period for open discussion of more fundamental issues.
